

What Happens After a Brand Study Request

From the moment a customer requests a free Social Media Growth brand study, to the three packages they can pick from — who does what, how long it takes, and where a human is required.

— PART 1

Brand study request

The customer requests a free brand study on the Social Media Management service page. Nothing is charged.

Turnaround: 2–3 business days, from request submitted to both reports (internal + client) ready for the admin to send. This covers the full 9-audit research pass plus compilation into both documents — not a same-day rush, but fast enough to keep momentum while the research stays genuinely thorough.

Doing the brand study

Two agents run in sequence — research, then compilation. A human reviews before anything reaches the customer.

01

social-media-brand-study – agent

Locks the industry archetype (Step 0), then runs all 9 audits: Page, Industry, Competitor Analysis, Content, Gap, Page Performance (6mo), Missing Functions, What's Missing synthesis, and SWOT groundwork. Produces raw findings — not the final documents.

Tools: Read, Grep, Glob, Write, WebSearch, WebFetch

02

social-media-brand-study-reporter – agent

Takes those raw findings and compiles them into two separate documents — the internal report and the client report (see Part 3). Writes the internal report first, then trims it down into the client version, never the reverse.

Tools: Read, Grep, Glob, Write

Admin review – human

Reviews both documents, attaches the client report as the PDF brief in the proposal form, fills in the 3 tailored packages, and sends. This is the one required human checkpoint before anything reaches the customer.

Reports generated

Two documents, always produced separately — never merged, never just one.

DOCUMENT	AUDIENCE	CONTAINS
1. Internal report	Admin / specialist team only	Full detail, unredacted — every audit finding, draft fix content, raw notes, the complete prioritized fix checklist
2. Client report	The customer	A short teaser — summary, Opportunity Score, 3–5 headline findings, SWOT snapshot, fix count by category, projected score per package tier

Full worked examples of both documents are generated and delivered as two separate files — not included in this PDF.

The three packages

Catalog defaults — the brand study tailors scope and price to the specific business, but the structure below stays the same.

Basic

800

tokens · ≈ Rs 8,000

- + Platform audit — 1 platform
- + 5 fixes from the checklist
- + Content calendar
- + 15 posts, incl. carousels
- + 2 Reels
- + 6-month rolling report
- + Best-practices guide

Initial delivery: ~3 business days ·
Management window: 14 days

MOST PICKED

Standard

1,750

tokens · ≈ Rs 17,500

- + Everything in Basic

- + 15 fixes from the checklist
- + Deeper competitor benchmark
- + 18 posts + 15 Reels/Stories
- + Custom growth playbook
- + Ads strategy (recommendations)
- + Dedicated specialist

Initial delivery: ~7 business days ·
Management window: 30 days

Who does what, per package

Every deliverable is drafted by an agent. A human is still required wherever the deliverable becomes a live change — applying a fix, posting, or executing a paid campaign — since none of the agents have live platform-write access yet.

Basic

ACTIVITY	AGENT	HUMAN ROLE
Platform audit (1 platform)	platform-auditor	• Reviews before sending
5 fixes, ready-to-apply	platform-auditor + content-calendar	• Applies each fix live
Content calendar (15 posts + 2 Reels)	content-calendar	• Approves before scheduling
6-month report	reporting	• Reviews before sending
Best-practices guide	content-calendar	• Reviews before sending

Standard (+ everything in Basic)

ACTIVITY	AGENT	HUMAN ROLE
Platform audit (2 platforms)	platform-auditor	• Reviews before sending
10 fixes total	platform-auditor + content-calendar	• Applies each fix live
Competitor research	competitor-research	• Reviews before sending
Brand voice & style guide	brand-voice	• Approves before use
Content calendar (30 + 8)	content-calendar	• Approves before scheduling
Monthly action plan	reporting	• Reviews before sending

Premium (+ everything in Standard)

ACTIVITY	AGENT	HUMAN ROLE
Platform audit (up to 5 platforms)	platform-auditor	• Reviews before sending
15 fixes total	platform-auditor + content-calendar	• Applies each fix live
Deeper competitor benchmark	competitor-research	• Reviews before sending

ACTIVITY	AGENT	HUMAN ROLE
Content calendar (45 + 15)	content-calendar	• Approves before scheduling
Custom growth playbook	reporting	• Reviews before sending
Ads strategy (recommendations)	ads-strategist	• Reviews; executes via • Meta/Google Ads service
Dedicated specialist	—	• Assigned point of contact throughout

All of the above is coordinated by `social-media-orchestrator`, which dispatches the right specialists for the tier and assembles their output — it never produces a deliverable itself.

Brand Study Journey — internal reference

Timelines and human touchpoints reflect current agent tool access — no live platform-write yet.
