

FREE BRAND STUDY

Ceylon Bites — Your Social Media Brand Study

We looked at your Instagram and Facebook presence as a Colombo bakery & café. Here's what we found.

Opportunity Score — Room to Grow

Your visual brand identity is genuinely strong — better than any competitor we reviewed — but a handful of fixable gaps are holding back reach and engagement well below what this brand deserves.

■ What we found

- 01 Your Instagram link-in-bio is dead — it 404s. Anyone who taps it right now hits a broken page.
- 02 Your Facebook page is categorized as "Community" instead of "Bakery" — this actively hurts how often Facebook recommends you to nearby food searches.
- 03 You're not doing the one content format working best in your category right now — process/behind-the-scenes video. Nobody in your area combines that with genuine food-forward content the way you could.
- 04 Your engagement rate is running below the typical range for cafés/bakeries your size — and your posting frequency is under half of what actively-growing accounts post.
- 05 You currently have zero paid amplification, while at least one nearby competitor runs ads every weekend.

■ Quick SWOT

STRENGTH

Your visual brand identity — consistent, warm, distinctly yours

WEAKNESS

Posting cadence and content variety both well under where they need to be

OPPORTUNITY

A content angle no competitor in your area currently owns

THREAT

A nearby competitor is actively growing distance in content volume and paid presence

■ What we're recommending

We found **16 fixable issues**, ranked by priority:

■ If you fix them — projected score

PACKAGE	FIXES IMPLEMENTED	PROJECTED OPPORTUNITY SCORE
Basic	5 fixes	34 → ~48
Standard ★	10 fixes	34 → ~66
Premium	15 fixes	34 → ~82

Directional projections based on which issue categories each package covers — not a guarantee, but a realistic range based on comparable accounts.
