

How the Social Media Team Operates

A walkthrough of the AI agent team that runs the Social Media Management service — from the first free brand study through to the deliverables a client actually receives, with real examples of each output.

Service Social Media Management **Agents** 9 **Packages** Basic • Standard • Premium

— PART 1

The end-to-end workflow

Four stages, each with its own agent(s). Nothing is charged until stage 3, and no deliverable work happens until stage 4.

What the brand study includes

Nine audits, run against the client's actual public profiles (or real Insights data, if an access token has been supplied) — the depth an agency would deliver on first onboarding a client, not a surface scan.

01

Page Audit

Bio, CTA button, link-in-bio, highlights, verification, business info.

02

Industry Audit

What "good" looks like for this specific industry — format, cadence, benchmark engagement.

03

Competitor Analysis

3–5 real competitors: cadence, what's resonating, tone, weak spots.

04

Content Audit

The brand's own content as a body of work — pillars, consistency, best/worst posts.

05

Gap Audit

What competitors and the industry have that this brand doesn't.

06

Performance (6mo)

Reach, engagement, follower-growth trend — real Insights if a token was supplied.

07

Missing Functions

Unused platform features — shop tab, quick-replies, link stickers, broadcast channel.

08

What's Missing

Gap Audit + Missing Functions pulled into one clear synthesis.

09

SWOT Analysis

Mapped from every audit above — every point traceable to a specific finding.

Step 0 — the industry filter, locked in first

Before any audit runs, the business is classified into an archetype — a car dealership and a hair salon aren't judged by the same yardstick, even though both are "local businesses on Instagram." The archetype changes expected content pillars, what counts as a missing feature, and who the real competitors are.

ARCHETYPE	CONTENT PILLARS	MISSING-FUNCTION CHECKS	COMPETITOR SET
Automotive / Vehicle Sales	Walkaround videos, financing offers, delivery-day moments	Inventory tab, "Enquire" quick-reply, financing link	Other dealerships, same city & price tier
Service-Based Business	Before/after proof, behind-the-scenes, testimonials	Booking link, quote-request quick-reply, service-area info	Other providers, same service & geography
Retail / E-commerce	Product features, UGC/unboxing, restocks	Shop tab, product tagging, checkout-in-bio	Comparable sellers, same price tier
Food & Beverage	Menu items, kitchen process, specials	Order/delivery link, reservation link	Nearby venues, same cuisine/bracket
Real Estate	Listing walkthroughs, market updates	Listing catalog, enquiry quick-reply	Other agents/agencies, same area
Hospitality / Travel	Property showcases, guest stories	Booking-engine link, review aggregator	Comparable properties, same region

Not everything varies by industry, though — a fixed set of checks run **identically for every business**, regardless of archetype:

Profile & setup

Bio keyword-searchability, image quality, business hours, broken links.

Content substance

Format mix, value-vs-sales ratio, raw/unfiltered vs. over-polished, "content about making content," trend participation, posting frequency, brand consistency.

Production quality

Image formats per placement, logo placement, hashtag mix, Reels frame-by-frame hook structure, burned-in subtitles.

Engagement & scent

Response time, analytics presence, accessibility, and scent congruency — does a post's promise match where its link actually sends someone.

Worked example — Ceylon Bites, a Colombo café & bakery

Used throughout this document as a running example. One Instagram account, 3,400 followers, posting roughly twice a week.

PAGE AUDIT — EXCERPT

PLATFORM	WORKING	BROKEN	PRIORITY
Instagram	Bio states location + specialty clearly	Link-in-bio points to a dead Facebook redirect	Quick
Instagram	Story highlights well organized	No CTA button configured	Quick
Facebook	Hours & address filled in	Page category is "Community," not "Bakery"	Quick

SWOT — EXCERPT

STRENGTHS Consistent warm visual identity matching the physical café; well-organized Story highlights.	WEAKNESSES No CTA button; posting 2×/week vs. a 5×/week competitor average.
OPPORTUNITIES Zero competitors post the baking process as Reels — a wide-open, high-engagement format.	THREATS Colombo Coffee Co., three blocks away, posts daily and runs weekend Meta ads.

FIX CHECKLIST — EXCERPT (FULL CHECKLIST SHIPS FREE IN THE BRIEF; HOW MANY GET ACTUALLY IMPLEMENTED DEPENDS ON THE TIER PICKED — SEE PART 3)

Page fixes

☐ **Add a CTA button** ("Order Food" or "Call") — Instagram profile currently has none. Quick

☐ **Fix the link-in-bio** — currently redirects to a dead Facebook page. Quick

Content fixes

- ☐ **Introduce a weekly Reel** of the baking process — the single biggest open opportunity found.

Medium

Ads fixes

- ☐ **Install the Meta Pixel** — not present on the site; blocks any future retargeting.

Involved

The three packages

Catalog defaults — the brand study tailors scope and price per business, but the structure and agent assignment stay the same. "Fixes" scale 5 → 10 → 15 by tier, taken in priority order off the brand study's checklist.

Basic

800

tokens · ≈ Rs 8,000 · 14-day management · 1 platform

- + Platform audit — 1 platform
- + 5 fixes from the checklist, ready-to-apply
- + Content calendar
- + 15 posts, incl. carousels
- + 2 Reels
- + 6-month rolling report w/ insights
- + Organic growth best-practices guide

Agents:

platform-auditor · content-calendar · reporting

MOST PICKED

Standard

1,750

tokens · ≈ Rs 17,500 · 30-day management · 2 platforms

- + Everything in Basic
- + Platform audit — 2 platforms
- + 10 fixes from the checklist, ready-to-apply
- + Competitor research
- + Brand voice & style guide
- + 30 posts, incl. carousels
- + 8 Reels + Stories
- + Monthly action plan

Agents:

+ competitor-research · brand-voice

Premium

2,500

tokens · ≈ Rs 25,000 · 30-day management · up to 5 platforms

- + Everything in Standard
- + Platform audit — up to 5 platforms
- + 15 fixes from the checklist, ready-to-apply
- + Deeper competitor benchmark
- + 45 posts, incl. carousels
- + 15 Reels + Stories
- + Custom organic growth playbook
- + Ads campaign strategy (recommendations)
- + Dedicated specialist

Who's responsible for what

One agent, one deliverable. The orchestrator never produces content itself — it lists, decides, dispatches, and assembles.

Research & proposal

social-media-brand-study

PRE-PURCHASE

Runs all 9 audits above and produces the SWOT + prioritized fix checklist.

Tools: Read, Grep, Glob, Write, WebSearch, WebFetch

brand-study

PRE-PURCHASE

Turns the research into the 3 tailored package options, in the exact format the admin proposal form needs.

Tools: Read, Grep, Glob, Write, WebSearch, WebFetch

Delivery team

social-media-orchestrator

ALL TIERS

Lists the roster, decides which specialists this order needs, dispatches them, assembles the final package.

Tools: Agent, Read, Grep, Glob, Write

social-media-platform-auditor

BASIC · STANDARD · PREMIUM

Platform audit — profile setup, cadence, engagement, gaps. Scope: 1 / 2 / up to 5 platforms.

Tools: Read, Grep, Glob, Write, WebSearch, WebFetch

social-media-content-calendar

BASIC · STANDARD · PREMIUM

Content calendar + post/carousel/Reel copywriting. Matches the brand-voice guide when both are in scope.

Tools: Read, Grep, Glob, Write, WebSearch

social-media-competitor-research

STANDARD · PREMIUM

Competitor benchmark — cadence, formats, engagement patterns, gaps to own.

Tools: Read, Grep, Glob, Write, WebSearch, WebFetch

social-media-brand-voice

STANDARD · PREMIUM

Brand voice & style guide — tone, do's/don'ts, visual notes, caption structure.

Tools: Read, Grep, Glob, Write

social-media-reporting

BASIC · STANDARD · PREMIUM

6-month report → monthly action plan → custom growth playbook, scaling with tier.

Tools: Read, Grep, Glob, Write, WebSearch, WebFetch

social-media-ads-strategist

PREMIUM ONLY

Ads strategy recommendations only — targeting, budget, creative direction. Not execution.

Tools: Read, Grep, Glob, Write, WebSearch

What the output looks like

Continuing the Ceylon Bites example, at the **Standard** tier — this is roughly what a client receives.

Content calendar (week 1 of 4)

DAY	FORMAT	HOOK	CTA
Mon	Carousel	"5 things on our counter you haven't tried yet"	Tag someone who needs this
Wed	Reel · 15s	Sourdough shaping, start to finish	Save this for your next bake day
Fri	Post	Weekend specials board, shot at golden hour	DM to reserve a table
Sat	Story ×3	Behind-the-counter, 8am opening	Poll: "Coffee or tea person?"

Competitor research — excerpt

COLOMBO COFFEE CO. (PRIMARY COMPETITOR)

Posts daily, mostly Reels of latte art and their roastery. Highest-engagement post (4,100 likes) was a 20-second "day in the life of a barista" — a format Ceylon Bites hasn't tried. Runs Meta ads only Fri–Sun, always the same static promo — an easy format to outclass with the Wed Reel format above.

6-month performance report — excerpt

REACH / MO

18.4k

▲ 22% vs. 6mo ago

ENGAGEMENT RATE

3.1%

▲ 0.6pt

FOLLOWERS

3,412

▲ 9% growth

BEST FORMAT

Reels

2.4× static posts

So what: the growth inflection lines up exactly with the first baking-process Reel going up in month 3 — the single clearest signal in the account's history.
Recommendation: shift the format mix toward 2 Reels/week minimum next cycle.

Ads strategy — Premium tier only (recommendation, not execution)

Boost the top-performing baking Reel with a small always-on budget (~Rs 1,500/day), geo-targeted to a 3km radius around Colombo 5 — matching where the account's actual followers cluster. Creative direction: more of the same unpolished, native-feeling process footage; avoid a polished studio look, it underperforms this format. *Execution — actually building and running this campaign — is out of scope here; that's the Meta Ads service.*

What the agents can actually do, per package

Every agent here runs on Read, Write, WebSearch, WebFetch — no live platform-write access exists yet. A "fix" or a post is delivered as a **ready-to-apply artifact** — the exact bio copy, the specific CTA to select, a ready caption — not a change already made on the client's live account. An operator or the client is still the one who clicks "publish" or applies it.

Basic — 800 tokens

ACTIVITY	AGENT	WHAT IT PRODUCES
Platform audit (1 platform)	platform-auditor	Findings table: setup, cadence, engagement, gaps
5 fixes, ready-to-apply	platform-auditor + content-calendar	Exact copy/CTA/caption fixes, top 5 by priority
Content calendar (15 posts + 2 Reels)	content-calendar	Full 14-day plan: captions, hooks, CTAs
6-month report	reporting	Reach/engagement/follower trend + next steps
Best-practices guide	content-calendar	General organic-growth playbook

Standard — 1,750 tokens (+ everything in Basic)

ACTIVITY	AGENT	WHAT IT PRODUCES
Platform audit (2 platforms)	platform-auditor	Same, doubled scope
10 fixes total	platform-auditor + content-calendar	5 more, next in priority order
Competitor research	competitor-research	2–3 competitor breakdown: cadence, formats, gaps
Brand voice & style guide	brand-voice	Tone, do's/don'ts, caption structure — feeds the calendar
Content calendar (30 posts + 8 Reels/Stories)	content-calendar	Scaled, now voice-matched

ACTIVITY	AGENT	WHAT IT PRODUCES
Monthly action plan	reporting	What changes next cycle based on this period's data

Premium — 2,500 tokens (+ everything in Standard)

ACTIVITY	AGENT	WHAT IT PRODUCES
Platform audit (up to 5 platforms)	platform-auditor	Scaled further
15 fixes total	platform-auditor + content-calendar	Full checklist, or an honest note if fewer than 15 exist
Deeper competitor benchmark	competitor-research	+ growth trend, Ad Library check, positioning summary
Content calendar (45 posts + 15 Reels/Stories)	content-calendar	Largest tier
Custom growth playbook	reporting	Tailored, not generic
Ads strategy	ads-strategist	Targeting/budget/creative <i>recommendations only</i>

What no agent does at any tier today: post or schedule anything live, reply to comments/DMs, pull real Meta Insights without an operator-supplied token, or execute the Premium ads strategy — that's a handoff to the ads skill / Meta Ads service.
