

Basic Package

1,000 tokens (Rs 10,000) 4-day delivery

- AI Agent — researched, drafted, or audited by the delivery team's agents
- Human — requires a person on our team (or you) to actually apply/execute it
- Agent + Human — agent produces it, a human applies or delivers it

WHAT'S INCLUDED	RESPONSIBILITY	WHO, SPECIFICALLY
Tool stack check — confirms GA4/tracking + heatmap tools are actually installed, with recommendations for what's missing	AI Agent	cro-funnel-auditor — presence check via page-source detection, not a setup; recommends from our vetted tool list (e.g. Microsoft Clarity, free) rather than installing anything
CRO audit of top 3 pages (landing, product, checkout)	AI Agent	cro-funnel-auditor
7 Deadly Sins of CRO — quick scan for the most common conversion killers	AI Agent	cro-sins-auditor — pass/fail scorecard: too much text, layout, eye flow, CTA, social proof, load speed, distractions
Top 5 drop-off points, ranked by impact	AI Agent	cro-funnel-auditor
CTA + form quick fixes	Agent + Human	cro-funnel-auditor drafts the fix; a human implements it on your live site (no write access to client platforms)
Written fix guide	AI Agent	cro-funnel-auditor

Why this matters: our agents don't have write access to your live site, ad accounts, or platform listings — every agent-produced finding or fix comes as a ready-to-apply artifact. Anything marked **Human** or **Agent + Human** means a person on our team (or you, if you'd rather implement it yourself) applies it.
